Senior Software Engineer

Creative software engineer with experience in game development, layout engines, large platform development, and optimization. Driven by curiosity to learn and solve complex problems, and passion for game design and software development.

Skills

Languages: C++ | C# | Lua | JavaScript | HTML | CSS | TypeScript | GDScript | Python

Frameworks: Vue

Game Engines: Godot | Unity

Experience

Microsoft, Redmond, WA

June 2017 – July 2025

Senior Software Engineer – Microsoft Edge, September 2022 – July 2025

Software Engineer II – Microsoft Edge, June 2017 – September 2022

C++ | C# | JavaScript | HTML | CSS | TypeScript | Python | JSON

- Worked on both the Microsoft Edge layout and composition teams, collaborating with partner teams across Microsoft Edge and Microsoft Office organizations.
- Integrated accessibility APIs for Microsoft Edge and open-source Chromium, aligning with Web Accessibility Initiative - Accessible Rich Internet Applications (WAI-ARIA) standards and Microsoft UI Automation (UIA), which significantly improved user experience and accessibility compliance.
- Integrated a Microsoft API into Microsoft Edge for AI-powered [text suggestions](#), providing advanced auto-complete behavior capable of completing sentences from surrounding context, empowering users to write more quickly, accurately, and confidently.
- Integrated a Microsoft Windows API into Microsoft Edge and open source Chromium for an AI-powered [handwriting to text](#) input experience, empowering users to write how they want and input anywhere with natural handwriting and gestures for stylus enabled devices.
- Mentored four students through the Microsoft Explore Program, coaching them on software development systems and processes, offered advice, and provided feedback. Resulted with successful feature presentations and demos by mentees.
- My open-source contributions can be found at chromium-review.googlesource.com, authored with the emails “adettenb@microsoft.com” and “adam.ettenberger@microsoft.com”.
- Thrived collaborating remotely from 2020 through 2025 during which a promotion to Senior Software Engineer (L63) was earned.

Amazon, Seattle, WA

January 2017 – June 2017

Software Development Engineer - Kindle Rendering

C++

- Worked on new layout features and unit tests for the Kindle layout engine.

Sledgehammer Games, Foster City, CA

June 2013 – January 2017

Software Engineer, March 2015 - January 2017

Associate Software Engineer, September 2013 - March 2015

Tools Engineer Intern, June 2013 - September 2013

C# | C++ | Lua | JSON

- Developed user interface elements for Call of Duty: Advanced Warfare and Call of Duty: WWII.
- Created menus, 2D and 3D UI elements, and UI systems that improved the shipped games.
- Collaborated with a small team of engineers and artists and coordinated with external studios.
- Resolved performance and memory issues related to in-game UI components and internal tools.
- Migrated and implemented new features in a modular in-house tool using C# WPF, third-party Telerik controls, and the Microsoft Prism Library.
- Contributed to the development of a UI Editor module within the mentioned tool, managing JSON layout files and exporting Lua scripts for game integration. Implemented the foundation for the module's rendering logic, complex user interactions for manipulating elements on a canvas, and a feature rich keyframe animation timeline editor. Empowered designers to easily create high-quality menus, UI elements, widgets, and complex animations without code by significantly reducing friction.

Presentations

Stylus Handwriting on Windows [BlinkOn 19]

October 2024

Microsoft | Chromium | Microsoft Edge | BlinkOn | youtu.be/5nELac-Wgo0?feature=shared

Personal Projects

Portfolio Website

June 2025

Vue | JavaScript | HTML | CSS | Vite | adamettenberger.com/projects/website

Match-3 Game

May 2025

Godot | GDScript | JavaScript | HTML | adamettenberger.com/projects/match_three

WebGL Metaballs

October 2012

JavaScript | HTML | CSS | WebGL | GLSL | adamettenberger.com/projects/webgl_metaballs

WebGL Flocking

October 2012

JavaScript | HTML | CSS | WebGL | GLSL | adamettenberger.com/projects/webgl_flocking

WebGL Proto-Engine

September 2012

JavaScript | HTML | CSS | WebGL | GLSL | adamettenberger.com/projects/webgl_proto_engine

Competitions

RENU - Imagine Cup 2013 @ RIT

December 2012

JavaScript | HTML | CSS | adamettenberger.com/projects/renu

Education

Bachelor of Science (B.S.), Game Design and Development

Rochester Institute of Technology, Rochester, NY
